

Transition City Lancaster WEBPAGE

Note for groups on how to get info up there . . .

WHATS ON PAGE

Please keep sending regular info on meeting dates, venues and on how to contact the contact person for your group.

RESOURCES AND LINKS PAGE

Please send any good weblinks, local, national, international that relate to your group issues or more general. Given the massive mass of web pages in the world - we do need to focus on those which have a direct bearing on Peak Oil, Climate Chaos and building resilient communities

GROUP PAGES

Please use this space as you would like, text, piccies, diagrams, links . . . The aim is to interest new people browsing the page and encourage them to come along . . . so some outline of the projects you're working on - some vision or stories about all this - notes and minutes of meetings are unlikely to attract ! Also important to make clear for new folks how the group and projects relate to peak oil and climate chaos - as these threats are at the heart of the transition initiative

PRACTICALITIES

Please send text either in the form of an e mail or else as a word doc. No need to format word docs too carefully as this will be changed as text fits into the webpage and the styles are applied.

As TCL is responsible for the content of the webpage - please take care that all content is legally acceptable - no dodgy references to folk - and also no advertising. . the webpage will be moderated.

An open forum for all comments and questions is also under development.

Please send all items for the TCL web site to Steve at steve@quiver.plus.com
